Title: Testing, Inspection, and Marking Requirements for Cylinders.
OMB Control Number: 2137–0022.
Summary: Requirements in § 173.301 for the qualification, maintenance, and use of cylinders include periodic inspections and retesting to ensure continuing compliance with packaging

standards. Information collection requirements address registration of retesters and marking of cylinders by retesters with their identification number and retest date following the completion of required tests. The cylinder owner or designated agent must keep records showing the results of inspections and retests until either expiration of the retest period or until the cylinder is re-inspected or retested, whichever occurs first. These requirements ensure that retesters have the qualifications to perform tests and

identify to cylinder fillers and users that cylinders are qualified for continuing use. Information collection requirements in § 173.303 require that fillers of acetylene cylinders keep, for at least 30 days, a daily record of the representative pressure to which cylinders are filled. The following information collections and their burdens are associated with this OMB Control Number. Note, that these estimates may be rounded for readability:

Information collection	Annual respondents	Total annual responses	Time per response	Total annual burden hours
Cylinder Manufacture Marking	225	101,250	7.17 minutes	12,099

Summary: Shippers of explosives, in freight containers or transport vehicles by vessel, are required to certify on shipping documentation that the freight container or transport vehicle meets minimal structural serviceability requirements. This requirement ensures an adequate level of safety for the

transport of explosives aboard vessel and consistency with similar requirements in international standards. The following information collections and their burdens are associated with this OMB Control Number. Please note that these estimates may be rounded for readability:

Information collection	Annual respondents	Total annual responses	Time per response (minutes)	Total annual burden hours
